

journey beyond road trauma

A community site for collective healing, remembrance and positive action

In Australia there are about 1600 deaths on our roads every year. Alarmingly, another 140 people are seriously injured each day.

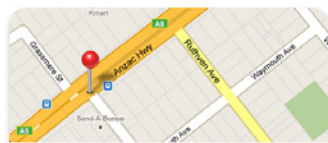

Journey Beyond Road Trauma is an online social network for all those affected by road trauma. The site is a space where you can find a network of support, a way to connect, a place to remember and tools to be positive and pro-active.

Whether the crash was yesterday or 15 years ago, the site can be used as an intimate place of sharing with family or friends, or can be used to engage with a broader online community.

The community is also a resource for the all Australians, particularly those with an interest in road safety as well as those who are affected by road trauma in their workplace (emergency services, lawyers, health workers and so on).

When you join the community you will be able to:

- Set up a profile
- Connect with others affected by road trauma
- Tell your story with blogs and video
- Watch short documentaries.
- Mark the scene of the collision (a virtual roadside memorial mark) on a Google Map

Link yourself to a tribute pin at the exact spot where a collision occurred.

The site provides a contact point for people to access counselling services, legal services, victims of crime support, road safety education programs and disability carers.

Under the guidance of road safety experts, the community can channel their grief into positive action by collectively campaigning for road safety. The online space can also be used as an educational resource to complement already existing road safety campaigns.

Produced in association with Screen Australia

Developed with the financial assistance of the South Australian Film Corporation

DOCUMENTARY AUSTRALIA FOUNDATION

Behind every fatality and serious injury statistic there are thousands of stories. Tell your story to educate others about the impact of careless driving.
